The 5G Madness

Mankind is extinct because they believed the laws of nature were not valid for them.

Did cell phone tower cause cancer outbreak at California school?

Cell phone safety innovator Norbert Heuser reviews new technology
for battling harmful EMF radiation emitted by wireless devices

4 students 3 teachers at **Weston Elementary School in Ripon, California** diagnosed with various forms of cancer since 2016. The victims, parents, and local environmental groups blame the cancer on a **cell phone tower erected on the school playground** for which the school district receives $23,484 annual compensation. The wireless company says their tower is operating **within federal guidelines.**
Who set up the federal guide lines ?

For years wireless companies and **the Centers for Disease Control (CDC)** have denied any correlation between cell phone radiation and cancer. But after a $30 million dollar study completed in November of 2018 by **the US National Toxicology Program**, it was confirmed that cell phone radiation was the **direct cause of cancerous tumors in male rats.** Failing to mention the newly clinically-proven cell phone/cancer connection, the CDC instead chose to encourage cell phone usage by stating on their website.

THE JOKE
"It is also important to consider the benefits of cell phones. Their use can be valuable in an urgent or emergency situation – and even save lives."

Progress

The technological progress
is basically
something valuable;
unless it abusive
and most importantly it is
not something used
against people.

Wo will take

the responsibility for

5G ?

No company has ever

proofed

that 5G is harmless.

So, exactly **how safe** are cell phones?

Not all.

No CELL PHONE COMPANY HAD EVER TO PROOF that cell phones are harmless.

I their manuals, somewhere hidden after page 195 they typically say:
“Do not hold the cell phone against your skin….”

They call these products:
SmartMeter
Smart Phone

Now we change names to

Smart Cigarettes
Smart Heroin
That makes them better/ harmless?

Electro Magnetic Fields
are not only associated
with Cell Phones
but as well with
Wifi
Smart Meter
GPS
all type of Screens
Microwave oven
Cars
Electric Cars

Who decides on the SAR ?

The often quoted SAR limits (Specific Absorption Rate) were created, designed and written (not by the FDA or Government) but by the mobile phone industry itself
to correspond to absolutely nothing
The consumer is led to believe that all is factual and transparent.
This could not be further from the truth.

Fox in a hen house

There is this

International Commission On Non Ionizing Radiation Protection.

When their President Professor Bernhard
was asked why the limits are so high,
as it harms the people, he answered:
“If we lower the limits it will kill the business”.

Main consequences for children:

blood brain barrier not fully developed

chilren develop 4-5 times more likely tumors

behavior disorders

hyper

depressed

water in the body will be destroyed

DNA damage

damage to the cells

A Danish study surveying more **than 13,000 children found an 80%** increase the likelihood of **behavioral problems** among children who use cell phones and whose **mothers used cell phones during pregnancy.**

Main consequences for adults:

behavior disorders

hyper

depressed

water in the body will be destroyed

DNA damage

damage to the cells

hip replacements

doubled between 2000 to 2010 doubled

it trippled for people between age 45 - 54

sperm

count and quality went drastically down

men kept phones in pocket or belt have ower sperm count by 30%

men born between 1990 and 1995 have 40% lower sperm count than men born earlier

Cell phone use linked with erectile dysfunction.

problems with women's fertilizations

Main consequences

colon cancer

rates previously declined started to raise in 1997
colon cancer for men / women aged 20 - 29
doubled between 1995 and 2013

prostate cancer

rising since 1997 world wide
men in USA under 55 increased 62% between 2004 and 2013
and nearly doubled for men 55 - 69 between 2004 and 2013

brain cancer

- **Research indicates that long-term cell phone users** run a significantly elevated risk of developing glioma, **a brain tumor that is often cancerous**
- tumors usually appearing **on the side of the head favored during cell phone conversations.**

Main consequences for nature

bees
insects
simply die
and may eventually disappear
and they
are responsible
for up to 80% of the
pollonations

BRAIN CANCER

KILLS MORE CHILDREN THAN ANY OTHER DISEASE

Yet 90% of Australians are unaware of this fact

THE PEOPLE HAVE A RIGHT TO VOICE AND COUNTERVOICE

~ No. 24/18: WARNING OF 5G ~

INTRO

5G is the new mobile communications generation to be launched in Switzerland and the EU countries by 2020. The new network will bring more data capacity to the consumer, allow autonomous driving of vehicles thanks to ultra-short response time and will process huge amounts of data in the industry. According to the mobile communications lobby, humanity is on its way out of the "technological stone age", but at what health price? This V&C shows why 5G must be rejected and this development stopped.

The Editorial Office (ch.)

5G radiation - uncontrolled experiment?

lw. The fifth generation (5G) of mobile communication technology will be 400,000 times more powerful than the second generation (2G), which started the era of digital radio in 1992. 5G will transmit in the microwave range, which are electromagnetic waves in the frequency range between 1 to 300 GHz. The existing 2G, 3G and 4G networks transmit in the range from 790 megahertz (MHz) to a maximum of 2.6 gigahertz (GHz). 5G is also supposed to use so-called millimeter waves up to 200 GHz. Such high frequency microwaves are so short that they can be absorbed through the skin. A study by physics professor Yuri Feldman of the Hebrew University of Jerusalem concludes that sweat glands attract the 5G radiation like antennas and are "cooked" by them. He demands that potential health threats be clarified prior to the introduction of the 5G standard. If not, humanity will be exposed to a "gigantic uncontrolled experiment"! **[1]**

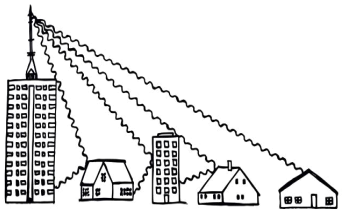
"If these devices and antennas with 5G technology fill the public space, they will affect everyone, including the more susceptible members of the public: babies, pregnant women, the elderly, the sick and electro hypersensitive individuals. Potentially, if G5 Wi-Fi is spread in the public domain we may expect more of the health effects currently seen with RF/ microwave frequencies including many more cases of hypersensitivity (EHS), as well as many new complaints of physical pain and a yet unknown variety of neurologic disturbances." **[2]**

Dr. Yael Stein from the Hadassah Medical Center in Jerusalem

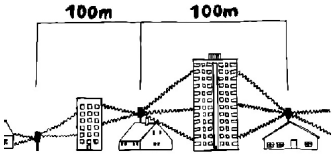
Massively higher radiation exposure due to 5G

lw./dd. The Swiss association Gigaherz.ch has been campaigning for years to protect citizens from the harmful effects of electromagnetic radiation. The president of Gigaherz, Hans-Ulrich Jakob, followed up on the question: How high are the frequencies that 5G needs for the huge amounts of data to be transferred and what does it mean regarding radiation exposure to humanity and the environment? He examined a writing from the Swedish company Ericsson, which will supply the equipment for 5G base stations including antenna systems to Swisscom: Ericsson supplies 5G base stations for the frequency ranges 3.6 and 28 gigahertz. These are wavelengths of 8.3 cm respectively 1.15 cm at 28 GHz. The rule of thumb is: If the wavelength is shorter than the wall is thick, (almost) nothing passes through it anymore. The following drawings show how Ericsson and Swisscom want to outsmart this physical disadvantage:

*In the previous propagation mode of mobile radiation in the **2G, 3G and 4G mode**, care was taken not to directly radiate at buildings, but over them, in order to provide as large a zone as possible. Behind the buildings there is a radio shadow, causing a poorer connection quality. An antenna must therefore be placed as high as possible.*

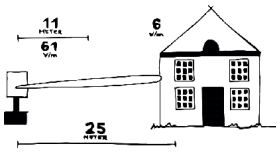


***With 5G, everything will become different**: Because of the difficulty of penetrating walls with 3.6 respectively 28 GHz, 5G must be virtually radiated on every individual facade. This means that at least every 100 m, a mobile radio antenna must be installed, at as low a height as possible.*

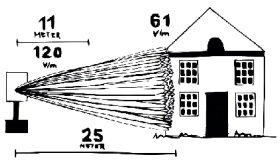


100 times more data at 100 times higher speed is promised. We were always puzzled how this would work. Now we know.

***Today's radiation exposure at 4G**: 1 radiation beam per transmission direction. After 25 m, the electric field strength is 6 V/m. In the safety zone around the antenna up to 11 m, the electric field strength is 61 V/m.*



***Expected radiation exposure at 5G:** Instead of one beam 64 beams, 8 each side by side and 8 each on top of each other. The electric field strength in the safety zone increases to 120 V/m up to a distance of 11 m. After 25 m, the electric field strength is still 61 V/m.*



The ICNIRP, which calls itself the International Radiation Protection Commission, which in fact is not a public authority, but a mere private association, has made its limit recommendations 5G-capable. These were increased without further ado from 137 V/m to 200 V/m for workplaces and from 61 V/m to 90 V/m for the general population. **[3]**

Electromagnetic Field 5G

~ No. 24/18 ~ V&C HAND-TO-HAND EXPRESS

Microwave radiation can be used as a weapon

ch. The "Active Denial System" (ADS) was developed back in the 1980s. This is a US-American non-lethal energy weapon that generates strong and focused microwaves of a 95 gigahertz frequency, which can be directed with an antenna towards humans or other targets from a distance of more than 500 meters. The electromagnetic radiation emitted by ADS has a very high energy density and penetrates the skin by 0.4 mm. The high radiation energy heats the water molecules in the skin within seconds to about 55 degrees Celsius (130 F). This is experienced as a pain stimulus by the attacked person and is supposed to cause them to flee. Presumably 5G radiation is going to have a lower radiation energy, but the health protection of citizens is not guaranteed, because it seems the profits of the mobile communications industry has a higher priority once again. **[4]**

"We, the undersigned, more than 180 scientists and doctors from 36 countries, recommend a moratorium on the fifth generation, 5G, telecommunication roll out regarding the potential hazards to human health and the environment. These should be fully investigated by scientists independent from the industry. 5G will substantially increase exposure to radiofrequency electromagnetic fields (RF-EMF) on top of the 2G, 3G, 4G, Wi-Fi, etc. for telecommunications already in place. RF-EMF has been proven to be harmful to humans and the environment." **[5]**

Appeal from over 180 scientists and physicians from 36 countries, from Sept. 12th, 2017, about the introduction of 5G, directed to the EU countries.

5G soon coming from space, too

lw. In addition to the construction of a 5G network on the ground, there is a proposed satellite based 5G network transmitting from space. In February 2018 the billionaire and Tesla boss Elon Musk presented his planned global, closely interlinked internet satellite network under the project named "Starlink". It is supposed to allow fast internet access to millions of people and would consist of a total of 11,943 satellites – this would mean about six times as many satellites as currently are orbiting the earth. In an Open Letter several doctors and physicists appeal to Mr. Musk to abort his project. They wrote: "Most likely your satellite project is already well-advanced. But, even if there is already a lot of money invested, it is important to consider this: It may be only a question of time until the facts will no longer be able to be ignored regarding the health hazard of mobile communication and in particular of 5G mobile communication […] It is extremely important to seriously examine the possible health damages to humanity, and most likely to reverse the course of development." **[6]**

Total surveillance via 5G and Wireless Lan technology

hvb. The coalition agreement of the German federal government stipulated that all cities should be converted into so-called "smart cities". At the core of this is the redesign of urban life and urban infrastructure using technologies such as 5G and Wireless Lan. These Smart City plans received the Big Brother Award this year. According to the founders, the Big Brother Award is given to authorities, companies or organizations that infringe on the privacy of individuals or make personal data available to third parties. So, the Smart City concept of the federal government is advertising for the "Safe City", the sensor-paved, totally monitored, remote-controlled and commercialized city. By doing so, Smart City has two main aspects: The industry wants the data for the purpose of consumption control and production planning and the states organs for the political control of society. In the coalition agreement of the federal government dated February 7th, 2018, data protection was repealed with the following wording: "We aim to enshrine the free movement of data as the fifth dimension of free movement." Will the totalitarian surveillance state become reality, according to George Orwell's book "1984"? **[7]**

Trump and Gates do not want 5G radiation

ch. In the state of Florida a law had been passed, which allows wireless telecommunication service providers to place 5G-antennas everywhere without authorization, except though Palm Beach, the residence among others of the billionaire Bill Gates and US-American president Donald Trump. According to Tom Bradford, a city administrator, the ban is temporarily blocking any applications to install wireless communications on public properties. This exception was justified with the excuse that the installation of the antennas would disfigure the cityscape. And against this would exist an opposition of the residents. It remains an open question as to whether the prohibition of 5G installation is to prevent total surveillance or serious health damage by high frequency microwave radiation in Palm Beach. However, they do the right thing in renouncing 5G until scientific studies exist showing its health impact on human beings! **[8]**

Closing Point ●

Regarding the question: "What can we do against this increasing radiation exposure?", the lawyer Dafna Tachover who works in USA and Israel gave the following answer: "This is the action we should take: we should make it clear to those government people when we talk about wi-fi in schools, the school principals, who have the personal responsibility and liability to protect children's health - to make sure they know they will be found personally liable for the damage they cause. They have a position of trust, and they betray that trust. And they should be found liable. It should be civil and criminal liability." **[9]**

Electromagnetic Field 5G

The difference between 4G and 5G
a bit comparable to am and fm radio

4G works on microwaves
5G works on millimeter waves

A type of electromagnetic radiation
that uses frequencies up to
6 gigahertz (GHz) for now

Later they will beef it up between
6 GHz to 100 GHz
These are submillimeter and millimeter
waves to transmit ultra-high data rates
to wirelessly transmit voice or data

Electromagnetic Field 5G

5 G means the fifth generation of cell phone technology

1G 2G 3G 4G = 790MHz - 2.6 GHz
5G starts with 3.6 GHz later 6 - 100 GHz

1 G = cellphone
2 G = cellphone + text
3 G = cellphone + Text + online
4 G = higher speed as of today
5G = 1000 times more traffic
10 - 100 x faster than 4G

Electromagnetic Field 5G

5G = 1000 times more traffic than 4G

5G = 100 x faster than 4G

larger data flow

faster data flow

bigger number of devices

can be connected

not only for phones

but as well for

running cars remotely

Connecting all kind of devices in

industry and private sector

Electromagnetic Field 5G

Frequencies more than 7 GHz
waves are so short
that trees, walls etc. will stop them.

More transmitters needed.
Planed to set up 300 000
new towers in the USA.

Every hundred to two hundred meters (300 to 600 ft).

This radiation emitted by 5G
permeates human skin more
aggressively than anything
previously emitted by
communications and consumer
electronics.

Electromagnetic Field 5G

Towers Everywhere

Every hundred to two hundred meters (300 to 600 ft) cell towers are needed.

This is due to the type of radiation emitted by 5G

- a radiation that permeates human skin more aggressively than anything previously emitted by communications and consumer electronics.

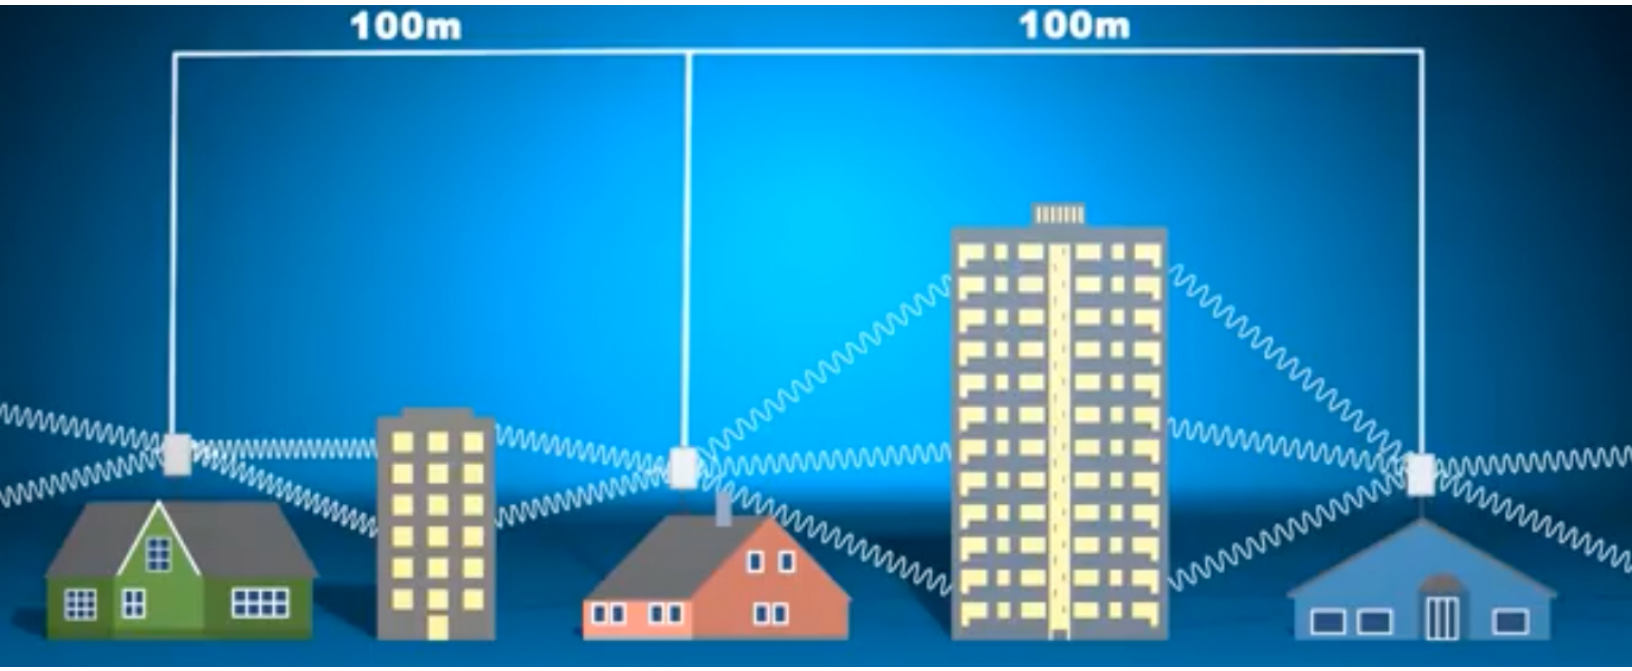
Electromagnetic Field 5G

Big Plan

Elon Musk is all about
placing 20,000 satellites
in the orbit
to shoot 5G
down to the earth.

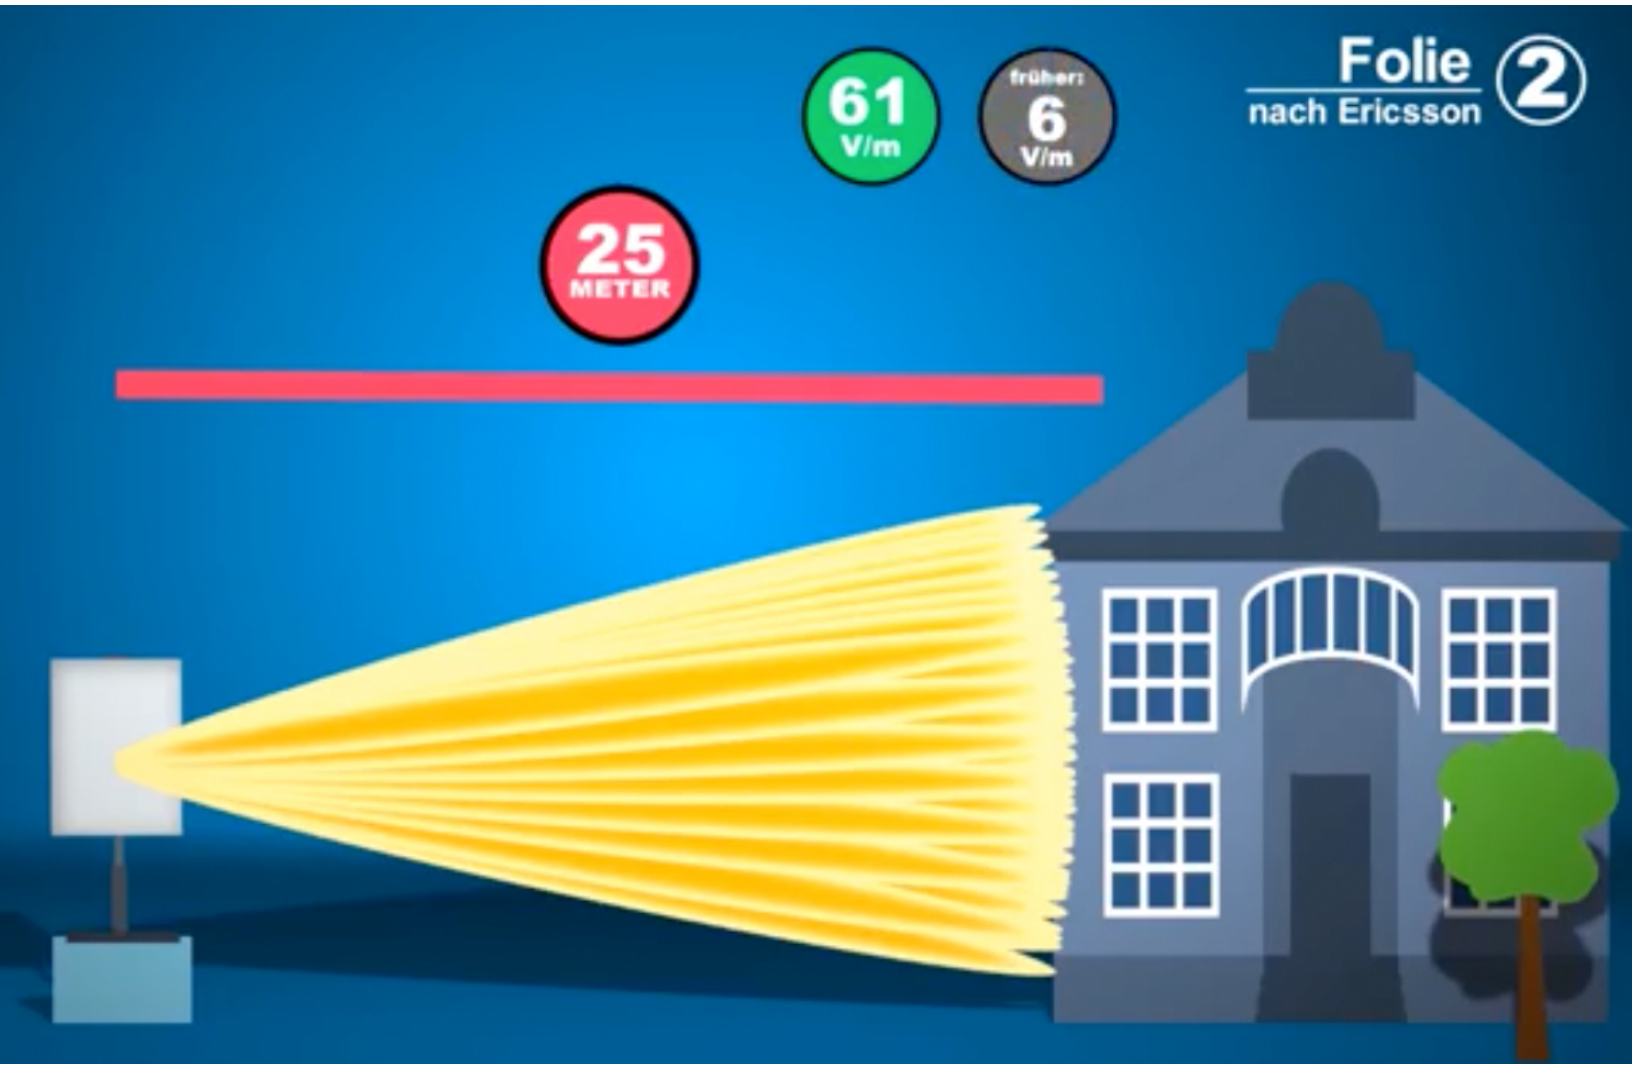
Electromagnetic Field 5G

Situation now 4 G



Situation then 5 G

Electromagnetic Field 5G



Situation then 5 G

Electromagnetic Field 5G

5G is all about
controlling
collecting data
internet use
email use
metering water &
electricity consumption
creating holograms

Electromagnetic Field 5G

New Frequencies

"Today's cellular and wireless networks rely on microwaves - a type of electromagnetic radiation that uses frequencies up to 6 gigahertz (GHz) to wirelessly transmit voice or data,"

The Environmental Health Trust (EHT) explains the difference.

"However, for 5G applications, new spectral bands in higher frequency ranges of more than 6 GHz to 100 GHz and beyond must be enabled using submillimeter and millimeter waves to transmit ultra-high data rates in the same time as microwave radiation”

https://ehtrust.org/key-issues/cell-phoneswireless/5g-networks-iot-scientific-overview-human-health-risks/

Electromagnetic Field 5G

5G

Worldwide, the project of the super-fast 5G network is being pushed forward with great force.

- 5G – a new technology whose health risks have not been adequately investigated.
- Even the manufacturers have no analysis to show.
- Governments have already auctioned off most of the frequency spectrum.
- Creating a global 5G cloud as part of a secret agenda.
- It is about the "restructuring" of the population.
- One has to put together pieces of the puzzle properly to see the plan.
- The argument controlling the cars, faster downloads etc. is a trick to distract the people from the real reasons and to get their approval.

Electromagnetic Field 5G

Everywhere we are told:

- how important that is for progress
- how wonderful then everything works
- that countries that do not have it, will be economically left behind overnight.
- the internet is fast as lightning, you can - oh, how wonderful! - download movies in seconds, your fridge will communicate directly with the supermarket that you need new milk, cereals, yogurts and cream cheese.
- At every turn the media is raving about the new, great 5G technology.

Electromagnetic Field 5G

- Governments are pushing for full deployment of 5G over the next few years.
  https://www.naturalnews.com/2018-09-27-5g- tech-fast-tracked-into-our-homes-by-next-year.html

- Trump is already pushing for 6G.
  https://www.youtube.com/watch?v=xtQiTuU9HO0

- we only hear of the benefits of the wonderful, new world with 5GZ.
- but what we do not see is they prove to us that 5G is harmless and safe.
- many scientists and professionals have the highest concerns.
- severe damage to plants, animals and humans are about to come.

Electromagnetic Field 5G

5G

Worldwide, the project of the super-fast 5G network is being pushed forward with great force.

- 5G – a new technology whose health risks have not been adequately investigated.
- Even the manufacturers have no analysis to show.

- The argument controlling the cars, faster downloads etc. is a trick to distract the people from the real reasons and to get their approval.

Electromagnetic Field 5G

Sweat channels in human skin

What's more frightening about 5G radiation is the way the human body reacts and processes it. Dr. Ben-Ishai from the Hebrew University of Jerusalem discovered in a recent research that human skin functions like a type of 5G radiation receiver and picks it up like an antenna.

https://www.researchgate.net/publication/323318222_The_human_skin_as_a_sub-THz_receiver_-_Does_5G_pose_a_danger_to_it_or_not

https://www.youtube.com/watch?v=VuVtGldYXK4

Electromagnetic Field 5G

Sweat channels in human skin

Same finding from others

"This type of technology that exists in many of our homes actually interacts with the skin and the eyes of humans," reports Arjun Walia for Collective Evolution about the study's findings.

"Human sweat channels act like a series of spiral antennas when exposed to those wavelengths emitted by 5G technology devices."

Electromagnetic Field 5G

"This type of technology that exists in many of our homes actually interacts with the skin and the eyes of humans," reports Arjun Walia for Collective Evolution about the study's findings.

"Human sweat channels act like a series of spiral antennas when exposed to those wavelengths emitted by 5G technology devices."

https://www.collective-evolution.com/2018/09/26/emf-frequencies-used-for-crowd-control-weapons-form-the-foundation-of-5g-wireless-network/

Electromagnetic Field 5G

Crowd Control Weapons

The 5G radiation uses the same frequencies as the pentagon's crowd control weapons.

The frequency range of 5G is exactly what military around the world use for crowd control: an unbearable burning sensation on the skin that makes people flee in panic.

The US military is already well acquainted with 5G technology because it has long used this radiation as a "non-lethal form of crowd control". The same 5G wavelengths used in the so-called "Active Denial System" (ADS) of the military are referred to herein as "weapons". When this radiation is directed at human bodies, it penetrates the uppermost skin layer. It works so violently that it causes an unbearable burning sensation.

Electromagnetic Field 5G

A surefire way to instantly disperse a crowd and rout people on the spot.

US, Russian, and even Chinese forces are already using 5G as a crowd-control weapon, suggesting terrible things for any kind of unwanted protests from peoples around the world. For this reason, many of these communities defend themselves as best they can against this 5G attack. Unfortunately, the worldwide introduction of 5G seems to be God's approved inescapable fact, no matter how hard and determined people resist and protest.

https://www.collective-evolution.com/2018/09/26/emf-frequencies-used-for-crowd-control-weapons-form-the-foundation-of-5g-wireless-network/

Electromagnetic Field 5G

“This technology is widely used by the top military forces and clearly demonstrates how effectively this high frequency energy can harm people and anything alive,”

warns Terence Newton of Waking Times.

"The struggle for 5G is becoming increasingly fierce everywhere at the community level and awareness of this important issue is spreading faster and faster."

Electromagnetic Field 5G

SMART DUST

- SMART DUST has been discussed since the 90s.
- Swarms of nanorobots that are coordinated via a cloud.
- Scientists work on behalf of DARPA (Department of Defense research) on this project for military use.
- Plant nanorobots in the human brain to take control of neuronal activity and remotely control it via a 5G cloud.
- Sounds like Hollywood and science fiction 2013 was already described quite precisely in the MIT Technology Review:

Electromagnetic Field 5G

"Intelligent dust particles embedded in the brain could be a completely new form of brain-machine interface, the engineers say."

"Real-time monitoring of brain function has skyrocketed in recent years. This is largely due to various new technologies that can monitor the collective behavior of neuronal groups."

"This work revolutionizes our understanding of the structure and behavior of the brain. It has also led to a new design discipline of brain-machine interfaces that allow people to control machines by thinking alone. "

Electromagnetic Field 5G

One of the authors, Michel Maharbiz, developed the world's first radio-controlled Beetle several years ago, a development that the Technology Review described as one of the top 10 technologies of 2009. What this looks like in practice in animals can be seen in the following video:

https://www.youtube.com/watch?v=OrewLnbBMG4

https://www.youtube.com/watch?v=NSU_MTA62Bc

- They will sell this technology as a new achievement that will make your life easier.
- The danger or the hidden plan of this project is to connect the people with a cloud in order to remotely control it from a central office.
- This is the ultimate enslavement from which there will be no escape; at least not on their own.
- The perfection of this is that the nanorobots are taken unnoticed via the respiratory tract.

Electromagnetic Field 5G

National Nanotechnology Initiative 2011

The dark agenda of the cabal is absolutely genuine and can be seen in the more than 60-page strategic plan of the National Nanotechnology Initiative of 2011 (88 pages since 2014).

It is a long-term investment in nanotechnology applications to enable the management of all aspects of human life within the environmental, health and safety monitoring matrix. There are an incredible 25 different US federal agencies involved.

Electromagnetic Field 5G

Barrie Trower

Dr. Barrie Trower, a former UK officer, secret service informer and microwave specialist since 1945, explains in his video why 5G will do us extreme damage and the consequences that result. It is about people, trees and nature and the catastrophic aftermath.

He talks about microwaves and Wi-Fi damage, as does Tetra Funk. Among other things, it is about the damage caused by microwaves on the reproductive organs of women.

Please check out his many YouTube videos.

"The greatest polluting element in the earth's environment is the proliferation of electromagnetic fields... ... All life pulsates in time to the Earth and our artificial fields cause abnormal reactions in all organisms... Increasing electropollution could set in motion irreversible changes leading to our extinction."

Dr Robert O Becker, Surgeon, Researcher and Author of *Electromagnetism and Life, The Body Electric. and Cross Currents. The Promise of Electromedicine, the Perils of Electropollution.*

"If I asked you how much more radiation is penetrating your body today compared to ten years ago, is it twice as much, three times as much? No, it's a quintillion times more. That's a one with eighteen zeros (1,000,000,000,000,000,000) "

Professor Olle Johansson, Karolinska Institute, Swe
