

# TRANSCRIPTS OF INTERVIEW

## Thrivetime Show Clay Clark & Karen Kingston

Speaker 1 ([00:00:02](#)):

Clay: [00:00:40](#)):

Yes, yes, yes, and yes. Thrive Nation. Many of you have been curious, have been paranoid, skeptical, worried about the contents of what's inside the COVID-19 vaccines. And so today's guest is a whistleblower and a researcher. She's a woman who, everything she's going to state on today's edition of the Thrive Time Show is going to be cited. It's going to be sourced and it's going to be mind blowing. So, I encourage everybody to grab a pen and a pad and prepare to enter into the lab and the dojo of mojo, because you're about ready to learn some things that will probably make your brain explode as it relates to the COVID-19 vaccines. Karen Kingston, welcome on to the thrive time show. How are you?

Karen: ([00:01:24](#)):

Good. How are you doing Clay?

Clay: Well, I I'm, I'm two parts. I'm like two parts excited to reveal what you know, to the, to the world. And the twoparts freaked out that what you're saying is true. So, I'm going to start here by asking you some questions. Moderna, you've been really, really aggressive into your research, with your research into Moderna and their patents. And, I have cited all of those patents. If our listeners go to [Timetofreeamerica.com](#), all of the patents that Moderna has, I've listed that on the button that says what's inside the COVID-19 vaccines. And I thought I would just take a moment if I can and ask you about the patents, because I feel like the patents prove their plan. And so I'm just going to read off a few of these patents to you. I just want to get your take on this. So the first patent you sent over to me, which again, I want you to be wrong, but you're not wrong. Nanospheres... why is Moderna? What does Moderna have a patent for nanospheres and what is a Nanosphere?

Karen: ([00:02:28](#)):

Sure. Let me, let me answer that question. Just so people know, the reason why I looked at the patents is because it was never fully disclosed to us what was in the ingredients, in the vaccines, first of all. And second of all, it was inexplicable, the breadth and the depth of the diversity of adverse events and deaths across age groups and healthcare spectrum. So I really wanted to find out what was going on. So I looked at the patents. Plus the facts and the stuff the doctor saw on a microscope. So a Nanosphere and that patent is a... So, first of all, nanometers, a nanometer or nano, yeah, nanometer, let's say it's one, one thousands of a micro meter and a micro meter is one, 1000th of a millimeter, which we know is one 10th of a centimeter. So that's like one, 1000000th of a millimeter. So it's very tiny. Does that make sense?

Speaker 4 ([00:03:19](#)):

Yeah. And I'm just, I want to make sure I get this because, you sent me the patents and I, you know, again, I, as a, I don't want to call me an investigative journalist, ReAwaken America tour organizer, entrepreneur guy. I don't know, I'm just a father of five kids who's concerned about the health of our nation and my kids, my five kids. You sent me the patent. I look at the patent, I'm going, whoa! And so I just wanting to know why does Moderna have these patents?

Karen: ([00:03:46](#)):

So Moderna, what they did, so if you read the master patent, the worldwide patent, as well as this patent under section 0 0 2, it says that the mRNA vaccines, are mRNA, you know, synthetic virus, viral code, encapsulated in lipid nano particles that are both diagnostic as well as therapeutic delivery system. So a therapeutic delivery system and a diagnostic are devices. So just for, so the reason why they have these patents is because these vaccines are not just allegedly therapies or vaccines, allegedly vaccines, they're also advanced, advanced technology medical devices, and

a diagnostic in, you know, it tells you that there's an interchange of information. And then a delivery device allows for delivery of a product over a period of hours, days, weeks, months, or years. So these nanospheres are, again, one, 1000000th of a millimeter and they're delivery devices.

(00:04:48):

Originally, they were delivery devices for what's called an anti-VEGF: anti vascular endothelial growth factor for age-related macular degeneration in your eye for retinal disease, to stop that overgrowth of vessels, blood vessels in your eye. So that was what they originally for, but they could be used for something called serum regulation factor, which is for the promotion of vascular growth, it's necessary for embryonic development and cardiovascular development. So, you know, basically those nanospheres can deliver anything that they want. And those nanospheres as well as the other patents that are in there for like the magnets and the discs, have biomarkers on them. So they can be marked to go to specific organs and cells within organs of your body. So that's what they are. And it's kind of scary

Clay: (00:05:37):

Nano magnets, nano magnets. You know, I, I have never thought to myself, you know, I would love to put a nano magnet in my body. And I... why does Moderna have a patent for nano magnets? So what is a nano magnet?

Karen: (00:05:50):

So again, something that's nano-sized is one, 1,000,000th of a millimeter. And so under the World and the U S patent that's available on Moderna's website, they talk about these other products that are in the vaccine. And one of them is the nano magnets. The nano magnets originally were used to attach to your bone and to deliver chemotherapies into your, into your bone cells, to, you know, for certain types of cancer, like Myelomas and leukemias and whatnot. So, you know, the other thing about magnets is they also help host, as you know, magnetic fields. So why Moderna have them in there for a cold, that's not really explicable. There has to be another reason. But it does explain why people are magnetic now. Some people do that thing where they put a key on them or a magnet, and it sticks, it's because they were injected with thousands or hundreds of thousands or millions of nano magnets. So now they're magnetic. So that explains why some people are magnetic because they have magnets in them.

Clay: (00:07:01):

Yeah. I know. It makes sense. It's just a lot here. Okay. So, there's patents for quantum dots. And again, I, just, maybe I'm a weird guy. I haven't found myself going to the doctor going, "doctor, Hey, Hey, Hey boss, here's the deal. I'm worried about a virus that has a 99.9% survivability rate if not treated. And so I would like for you to put a quantum dot in my body. Nor do I require an order. I remember a doctor or any member of the mainstream media saying, "listen, if you want to protect yourself from COVID-19, you know, what you need to do is take a shot. It's filled with nano magnets and nanospheres and quantum dots." What is a quantum dot and why is it in the vaccines?

Karen: (00:07:40):

So the quantum dots are related to something called Tesla apheresis, which is a self-assembling operating system. You can find this on riceuniversity.com. And it's made of shocker graphene oxide nano tubes, which are called single wall carbon nanotubes, which is another patent. And there are one atom thick. So one atom is, you know, you can't, it's an app. It's like, it's, you can't see it. It's, it's just, it's one atom. And then they're the Tesla apheresis, the quantum dot, is then, activated by an outside signal or impulse, if you will, or pulse, that would activate it. And that would allow this self-assembling, this unrolling, if you will, of these nanotubes to create an internal operating system. But what's really interesting, because I want to talk to you about this, Clay, is what's really interesting is, if you read the patent, I think it's section three, they say the quantum dot is based on the bore principle, the part four particle.

(00:08:43):

Do you know what that is? (No!) Okay. The bore particle is the energetic particle. It's the, it's between the atom that, sorry, the nucleus and the electron in an atom, and it's based on something called the observer effect. And so they, you, the bore particle only appears, based on if someone's observing it, if someone's looking for it, right? It's a very, it's quite... so quantum mechanics, it's the basis of our quantum mechanics. It's Schrodinger's cat, right? So,

there's an infinite number of outcomes. Right? And based on what the focus is on those outcomes, is what the outcome is most likely to be. It's quantum mechanics is the scientist version of our version of the power of prayer in general. Make sense?

(00:09:33):

Clay:

No, I mean, it makes sense. The words coming out of your mouth makes sense. Why you would want to put these in the vaccines doesn't make sense. Why...

Karen: (00:09:46):

Put them in that scene, because of the other pattern by Gail Elric out of Pfizer, and because of your favorite legislation, HR 6, 6, 6, 6, HR 6 6 6 6 is to provide grants, to conduct diagnostic testing for COVID-19 and related activities, such as contact tracing, mobile health, and tracing and individual residences and other purposes. So it's, there's another patent that was filed. And it was granted by the US patent office on August 31st of this year and it's called, I think it's called vaccine prioritization, you know, based on social something or other,

Clay: (00:10:34):

No, Ok. this is, this is where I'm, you're giving all these patents and everything you said on today's show I'm sighting. And I'm trying to take that information combined with the fact that Klaus Schwab, you know, Klaus, Schwab the head of the World, Economic Forum; this guy, Klaus, Schwab, he's being interviewed by Charlie Rose. And so he and Charlie are having one of those Charlie Rose conversations where, you know, it's, overly, I don't know, it comes across like the world and the people on the planet are so beneath them. And they're just, it's just, they're talking about the future of the world is... Klaus Schwab is God and he controls the world. And so Charlie Rose gets to the apex of the conversation. He says, "Hey, hey Klaus, Klaus..." shop back. What is the great reset, you know, all about, you know? What is," because Klaus Schwab head of the World, Economic Forum, he calls the Fourth Industrial Revolution and the great reset, the same thing.

(00:11:31):

They're synonymous in his mind, the Fourth Industrial Revolution and the great reset. So he says, "what, what's the great reset, all about? What's the Fourth Industrial Revolution all about?" This is what he says, Karen, I'm going to play this audio for you, which you've never heard before. So I'm going to play it twice. That way you can kind of marinate on what he's saying. This is Klaus Schwab folks (and I'll put a link to this video on today's show notes) the head of the World Economic Forum, when asked by, he's being asked by Charlie Rose, "what is the great reset truly all about?" This is what he says. Here we go.

Klaus: (00:11:59):

"So differences is of forced industrial revolution is, it doesn't change what you are doing. It changes you. If you take a genetic editing, just as an example, it's you who are change. And of course this has a big impact on your identity."

Clay: (00:12:18):

Okay. Well, one more time. He says, he says the difference between the Fourth Industrial... here we go.

Klaus: (00:12:21):

"The difference of forced industrial revolution is it doesn't change what you are doing. It changes you. If you take a genetic editing, just as an example, it's you who are changed. And of course this has a big impact on your identity."

Clay: (00:12:39):

Does this, do these patents make the gene editing that he is referencing where it changes? Not, not so much what you do for a living, but it changes you, is that, is that what these technologies do?

Karen: (00:12:50):

Yeah, they do. I mean, so when they kept saying that mRNA absolutely cannot change your DNA, mRNA absolutely can change your DNA. I mean Elon Musk joked on one of these shows, or like on stage once, talking about how cool he thought mRNA was, he's like, you know, you can literally turn a man into a butterfly. He's like, what the heck, caterpillars do it. And again, I thought Franz Kafka's metamorphosis was a metaphor for the pain and suffering in society, not that'd be cool to turn a person into an insect. But going back to the patents, if you look at table 54 in the Moderna patent, field 54, you pull up in front of yourself, if there's a table there that lists several different code, genetic codons from different products and the title you'll see as the hybrid, hybridization.

(00:13:42):

So how to create interspecies hybrids. And there's three lines there for Lucifer race, which is derived from a Firefly that glows blue in the Appalachian mountains, and they've got the genetic sequence there for it. Right? And so hybridization is the, creating new interspecies hybrids. So that's right there. That's the point of luciferase is to allow for integration of other DNA into your DNA, the purpose of mRNAs, the single helix, synthetic virus, or if it's like HIV, the retrovirus, right? The point is to hijack your cell and then to create complimentary DNA to that cell. That's what HIV is. It's cDNA. If you look at section 72, 72 says they can use RNA. RNA meaning, mRNA, siRNA. There's different RNAs, synthetic RNAs that you can use to do what? The first thing they list is to create triple helix DNA. There is no such thing as triple helix DNA in any of God's kingdom's, Clay, not in the animal kingdom and not in the plant kingdom.

Clay: (00:14:48): There's no, there's no such thing as triple helix, what?

Karen: (00:14:51): DNA, DNA.

Clay: (00:14:54):

So why is that significant to the average person that, you know, maybe eats too much at taco bell and likes watching Billy Madison? I mean average soccer, mom, soccer, dad, maybe they've been listening to a lot of Justin Bieber while they're driving in their car. You know, having a blast, blast thinking we're almost through the pandemic baby. We're almost back to normal if I just take this vaccine, but they're a little skeptical. What, what does, what does that mean?

Speaker 5 (00:15:18):

What this means is that it can cause, it can, shucks, it means a lot. First and foremost, you should be concerned that this can cause genetic disease in your body. Okay. Genetic diseases. They talk about things like Alzheimer's disease, Huntington's disease. We always are talked about, like, we have a genetic proclivity to develop disease. So this can actually induce genetic diseases that are transgenerational, right. And everyone's like, that's not true. Well, look, if they can come up with a gene therapy to prevent or treat Alzheimer's or Huntington disease, they can also come up with a genetic agent to induce it. I just want to be very clear about that. I'm not sure why people think this is me, fearmongering, you know, they, they start with, they're supposed to start with the disease and then revert it, but they can also start with the disease and then induce it.

Karen: (00:16:08):

But then the genetic mutations are what's alarming, I think, especially to us as Christians. Like, so we, what I talked about in Salt Lake City was like, we don't want to keep what's -- we want to take what's in the darkness and bring it to light. So scientists we know have been creating interspecies you know, or even, inter, well inter-species and then trans-species products, right? We know this from GMO from these plants and vegetables that have the nutrient taken out of them. We know this because there's a new form of salmon that's been hybrid with insects. So there's like an insect sample then that's available. So the next thing for the scientists to do, it'd be like, well, then it'd be great, you know, if we can start playing around with this technology and human beings and children. We know they've been doing it in an embryonic development. We know there's inter-species embryonic development for interspecies stuff going on in labs and trans species. So this isn't, this is something that has been not regulated by our government. You know, the biotech industry. Neither has artificial intelligence. So, it's to our best interest to

bring this stuff to light, not so that people are afraid, but so they realize that of the sickness and the illnesses that are in this world so that we can heal. That's why I'm bringing this forward.

Clay: [\(00:17:25\)](#):

Now think about this for a second real quick here. Okay. So if we go to [timetofreeamerica.com](http://timetofreeamerica.com), I'm going to put the puzzle together for folks. If you go to [timetofreeamerica.com](http://timetofreeamerica.com) and there's a button here that talks about, the button says the truth about renting religious leaders, and I'll put a link to it on today's show. So, there are organizations that one would think are Christian, or pro Christ or organizations are pushing the vaccine. So let me give you example. The Vatican, the Vatican hosted Global Thought Leaders for the transhuman code meeting of the minds. What? Yes. If you go to [timetofreeamerican.com](http://timetofreeamerican.com) and you click on the button that says, okay, the truth about renting religious leaders, you can see the Vatican! This is Dateline, July 29th, 2019 from Yahoo news, Global Thought Leaders assemble at the Vatican for the transhuman code meeting of the mind. Rick Warren, the head of the World Economic Forum, you know, the, "I wrote purpose driven church, purpose driven life, purpose driven, you know, purpose driven. And that's that guy, Rick Warren, the founding pastor of Saddleback Church. Rick Warren is really out front, really pushing this whole, he's pushing -- for people out there that don't know the name: Klaus Schwab is the founder of the World Economic Forum. And this is Rick Warren discussing the Francis Collins, of the National Institutes of Health and the World Economic Forum. Just listen to this for a second folks, if you haven't heard this.

Rick Warren: [\(00:18:53\)](#):

Can I say a personal word about Dr. Francis Collins? We have been friends, he and I have been friends for many, many years. I think we first met years ago when we were both speaking at the Davos World Economic Forum.

Clay: [\(00:19:07\)](#):

The Davos World Economic Forum, that's this group. And he goes on to explain in this video why he just thinks the World Economic Forum is the best thing ever. So people are being told, Karen, by their pastors to take the shots. You know, Dr. Fauci is teaming up with TD Jakes to push the COVID-19 vaccines. Rick Warren's pushing the COVID-19 vaccines, the Pope, you know, the Vatican, they're pushing transhumanism. As I understand the Bible, we shouldn't take technology derived from fetal tissue and put it in our bodies. We shouldn't want to edit the God's creation. What are your thoughts on just as a spirit-filled Christian like you are, discovering the all out, a hundred percent commitment that the globalists have to train the transhumanism agenda.

Karen: [\(00:19:56\)](#):

So when I discovered the patent and I read things like triple helix DNA, and I read things like hybrid, hibridization, I can't pronounce that word. And I read, you know, mRNA, the point of mRNA, it's modified RNA, the point is to modify genetic material. That's what it's for. Like, I don't understand why people are saying that's not what it's for. That's, that's what it's for. So I cried, I cried for all of God's children. I saw this as a something that was demonic and an attack on God's children. Satan cannot create, he can only steal and destroy, and he has to deseed first. And, American people in the world were deceived and then betrayed by our leaders. And I go to, I never understood Timothy 6:10. I'm going to just read it. I, from the KJV (King James Version) thank you, Clay, "For the love of money is the root of all evil, which while some covet after they air from faith and pierced themselves, and people were all in... I know people were incentivized, whether you're a school board, whether you're a church, whether your employer, whether you were a doctor (Fauci's evil), but, you know, whether you're a Congressman or Congresswoman, you were given a lot of money to be ignorant, to ignore the facts and to get along with the narrative that was brought on by people who understood God's code and how he created us in his image, the human genome.

And they decided to play God. These scientists decided to play God, and they have a lot of money. And they told people, listen to us, be blind to the truth. And we're going to pay you a bunch of money. And that's what happened.

Clay: [\(00:21:50\)](#):

Now for people out there that maybe don't understand how money works. You are, how would you describe your career in the pharmaceutical industry before? What did you do? What was your role in the pharmaceutical industry?

Karen: [\(00:22:06\)](#):

I started off in sales and I went under the marketing agency side. I moved out to California, the left coast, early two thousands. And, I have a very unique skillset. So, I became a consultant right away. And then as my consulting agency did very well, two companies. Johnson and Johnson, and a company called Luminous pre-funded my ad agency, with a large amount of money, I started, had an idea of adding c... I went through a difficult time with the divorce and some other betrayals in my life, and I dissolved it and I became a consultant. So, I, you know, it's a good, it's a good industry to be in. I don't, I've stopped obviously. My last client was March of this year. I've had people reach out to me in the mRNA field or industry and, friendly with them, but, you know, but I'm, I won't, I, you know, not until this, this industry is corrected and charged and convicted, do I have any interests really to return to it. I do believe in, like, nutraceuticals. I do believe in, the most powerful thing we have, Clay is the power of prayer and of asking forgiveness and repentance.

Clay: [\(00:23:18\)](#):

I'm going to bring this up because people are out there and maybe don't grasp this idea. Because people say, I just make sure we were getting this idea. You generated value in the marketplace through research. People paid you. That's how you made money. Now, again, the Big Pharma, people don't understand this. Big Pharma, Klaus Schwab, and the great reset, the, World Economic Forum, let's go with the Federal Reserve. Okay. They operate within the construct of Fiat currency. Now, please understand what this means. Fiat currency is where you can just print limitless amounts of money. So let's just give an example. Hunter Biden, Hunter Biden. The story we're told is that Hunter Biden was kicked out of the military for drug use. And, he did a lot of interactions with prostitutes that he filmed. He did a lot of drugs and we're led to, the narrative is that he went over to China and China said, "oh man, you have what it takes."

Clay: [\(00:24:14\)](#):

You're the guy that we want. You, based upon the fact that you're a drug user and you got kicked out of the military for drug use and you have sex with prostitutes, you're the kind of guy that we could invest in. So in fact, we want to give you \$1.3 billion. Well, you say, well, how does somebody like that get \$1.3 billion. It's Fiat currency. You don't care. And they can literally just print money. They print money. Here you go. Boom. All of a sudden Hunter Biden has a \$1.3 billion. And Karen, if they're really just printing money and throwing it at governors, elected officials, doctors. I mean, as an example, if you go to the hospital right now and they diagnose you with a positive COVID-19, as being positive with COVID-19, guess what? Hospital makes a lot of money. Karen, I talked to a nurse who came to one of the Reawaken American Tour events, and she said, she's never made more money in her entire life.

Clay: [00:25:07](#)):

She said, she's on the COVID floor. And she said, I am making an insane amount of money making great money. And I want you to know it is very true that Remdesivir causes renal failure and so does and Midazolam causes breath suppression, which kills patients. I go, what! she said, "Yeah. I heard your show where you said Remdesivir is a drug patented by George Soros in China. And it causes renal failure. And Midazolam is a breath suppressant. So, that actual CDC protocol, if you go to the hospital today and you have COVID-19, the CDC protocol calls for the use of Remdesivir and Midazolam. Remdesivir causes renal failure, Midazolam causes breath suppression. She said, it's true. It is the hospital protocol. It is true. And it does cause death. And I'm going, okay, where are we going with this?"

Clay: [\(00:25:50\)](#):

She says, I'm just telling you. It's just so sad because like a lot of us right now, during these challenging times, we need to keep our jobs. And so we're just, you know, we're behind you. And I'm going, but you're still work there? You still work there? "I do, because I just, I'm trying to pay off some debt right now." Can you maybe, cause I've never worked in the pharmaceutical industry. Can you walk me through the cognitive dissonance that somebody must have right now working in the pharmaceutical industry or... because you've actually done it before. When you see things that are occurring that are not ethical, but yet they continue the narrative. How does that even, how do you quit?

Karen: (00:26:26):

I quit. (You quit) I quit when I saw those things. I quit. I Pissed off a lot of people when I quit a few times.

Clay: (00:26:33):

So the people around you that didn't quit, how do they deal with it? How do they sleep at night? You still stay in touch with these people?

Karen: (00:26:40):

It is. It is Clay. Let me, so, because, I built, so I wasn't, you know, we all have original sin, right? So 10 years ago, I found myself in the middle of dissolving everything: my marriage, my company, everything. And I just knew I needed to get in front of the cross. Okay. And, I just knew the problem was I had built my life, my marriage, my career, my family away from Christ. That is what had happened. So, but prior to that, even, I still was, you know, you know I had that instinct to do what was right. I just, you know, but you know, that's not enough. You really, you need that connection with God and understanding salvation. But, I think what happened, and I know what happened for me, is that I wanted to feel loved.

Karen: (00:27:30):

And instead of understanding, God's love for me, I was looking for it in the world. So my community with the people I worked with in the pharmaceutical industry, so I wanted them to love me. So I wanted to be like them. I wanted to go along with the narrative. I, you know, like I made money because when I made money, I could then give people money or buy them things or donate to charities. And then that would make other people happy, not understanding that I have value in God's eyes and God loves me. And then I can love people through that love. Right. And so that's what, so I don't think these people are necessarily, you know, evil. That's not what's happening is that they're looking for acceptance and love in the wrong place. They're looking for it in this world and they're looking for it through what they can materialistically do for others and themselves. And I did the same thing for the longest time. And I got to tell you, when I was making, you know, I had a multi, whatever, seven figure industry, three, you know, two Escalades, a Mercedes, a million dollar house. I wished my life upon nobody. I was miserable. And I'm hanging with you guys now. I'm happy

Clay: (00:28:36):

Because I'm trying to... I was a disc jockey, you know, so I might, my job was, for a long time was, you know, convincing adults to drink copious amounts of alcohol on a Thursday at the Yucatan liquor stand. So, I didn't really, you know, come to Jesus until my son was born blind, you know. And I had built America's largest wedding entertainment company and were deejaying weddings. And I thought, you know, I just, I don't think I can be in this industry anymore. I need to sell it, which, get into something else. We all have our different... I'm just wanting to know, right now, how many people does it take to work on a patent for surface modified, semiconductor, metallic nanoparticles, or how many people does it take to work on a patent for quantum dots.

(29:17)

Karen: (00:29:17):

It's in regards to that world patent and master patent for Moderna. It's made of hundreds of patents. But you know, the people that came up with the nanospheres, who had good intentions, it was to treat retinal disease. And it wasn't to make any genetic mutations. There are some evil masterminds that created this master patent, right? I mean, let's just be clear that like not everyone in the industry has ill intentions, not everyone at the FDA does, not everyone at the NIH. A lot of people are oblivious to the work that they're doing and how it's being contributed to something that's to harm human beings or execute, you know, annihilate them. But look a little bit aren't even aware of that. But once you become aware of it, the question is, how do you continue to be part of that industry?

Clay: (00:30:06): So, who is aware of this? Who has the power to stop this? Like who is aware of what's inside these vaccines? I mean, how high does it, how, do no nurses contemplate what they're putting inside the bodies of people? Do no doctors have these thoughts? Do no governors have these thoughts? Do no heads of Moderna? I mean, does anybody?

Karen: [\(00:30:25\)](#):

Let's say you don't know the ingredients because they don't read the data. They're seeing injury, they're seeing harm. They're seeing death and they're not stopping it. That's the problem. So, I mean there was a drug called Pozicor that came out in 1998. It's a T-cell blocker for blood pressure. Only 20,000 people were prescribed it. There are one hundred and twenty six, one hundred twenty three deaths within a few months, right? From, you know, this is just, and they stopped it. They stopped the product. So, now nurses, doctors, they're seeing children getting hospitalized with heart inflammation. They're seeing children dying. They're seeing people with neurological disorders where they can't walk, you know, and they're, they have Huntington's disease like symptoms. And they're not, they're not screaming from the rooftops. Stop this madness for to inject people with something that is a cold to prevent a cold,

Clay: [\(00:31:21\)](#):

These patents, the, you know. Again, we go back to, the patents prove their plan. I mean, that's what made, if you read the patents, patents proved their plan. So what is their plan? What is their plan if left, you know, unobstructed, if they just, if you just said, ah, okay, we'll just do it. Well, what, what does that plan look like?

Karen: [\(00:31:41\)](#):

Well, the plan looks like it's taking away all of your God-given rights. I mean, great. So, what's the vaccine mandate. The vaccine mandate is saying you don't have some sovereignty over your body or your children's body, your employer does, or your government does. That's what that says, right? They're saying, people are like, well, what about the short term effects or long-term effects if I lose my job? Okay, well, you're giving up authority over your body to your employer. They're saying you don't have that. What I mean, what are, what does that do to you as a human being? And so, you now, have authority over nothing. You have no authority over your own body. So what this is, is and they say it's like, for the public health and safety. It's not, beyond socialism, it's enslavement. And now you have a smart app injected inside of you, you know, that's conducting electromagnetic waves and signals from an external source. Then only do you not have control of your body, you don't control your mind. You don't control your neurological system. And we're seeing that with the people that are injected; they have no control of their neurological system anymore.

Clay: [\(00:32:45\)](#):

So, you know, then there's legislation out there, for people out there who haven't looked it up here. Okay. There's legislation that that's called HR 6, 6, 6, and there's legislation HR 6, 6, 6, 6. So HR 6, 6, 6, folks. Look it up. And duck duck go, or Google: HR. 6, 6, 6. And there's legislation HR 6, 6, 6, 6. So there's four sixes. When you discovered that for the first time, what were you thinking as you saw that Congress is actually working on legislation that they chose to name and to number HR 6, 6, 6, and HR 6, 6, 6, 6.

Karen: [\(00:33:23\)](#):

So, HR 6,6,6 wants the CDC and the national, was it the CDC, I think, and the NIH or HHS, Health and Human Services, to declare racism as a national health emergency. (WHAT?!) So that's what that's about and a threat to National. So, racism now a national health emergency, which tells you that COVID-19 was never a national health emergency. So, because if re.. I mean, so that's that. The other one, 6, 6, 6, 6 is about this other, this technology being used to monitor, contact trace people based on their social networks, their social behaviors and your social behaviors dictate whether or not, you know, you need to be quarantined, kept at home arrest or potentially vaccinated, you know. So dude, or executed basically. I mean, there's, and there's another patent about that. And I know this sounds alarming and terrifying, but the truth is, Clay, like everything I talked about is available on our own government's websites, whether it's NIH.gov, USPTO.gov. I'm not sure what the .gov is for the HR bills, or sorry, the Congress bills. By the way, 6, 6, 6 and 6, 6, 6, 6 were kind of DOA. They only, they got 72 Democrats in the house to support them. And there was one Republican and I think he got a memo. They're like, hey, you know, dude ixnay on the 6 6 6 nay. And like, he, he then retracted it.

Clay: [\(00:35:03\)](#):

How can anybody sign that kind of thing?? It's craziness. Now let's continue down this...

Karen: (00:35:07):

11 people from, from California did. 11 of our House Representatives so that just tells you where I live.

Clay: (00:35:14):

Sick freaks now. Okay. So now I just, continuing down here. The Book of Revelation, Chapter 13, verses 16 through 18, someone says, I don't want to talk about the Bible. I want to talk about the vaccine. Listen, folks. This is a battle of good versus evil, light versus dark. I'm going to read this to you: John, on the island of Pa... he's, John is exiled on the island of Patmos. He's writing the Book of Revelation. God is inspiring him to write these words, Revelation Chapter 13, verses 16 through 18, Karen, I shall read to you. It says, "And he causes all, both small and great, rich and poor, free and bond, to receive a mark in their right hand or in their foreheads: And that no man might buy or sell, save that he had the mark, or the name of the beast, or the number of his name.

(00:35:50):

Here's the wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is 600 threescore and six." Well, I think to myself, who has a patent with a publication number, WO 2 0 2 0 0 6 0 6 0 6. Surely nobody would actually create a patent for a cryptocurrency using body activity, thus making it possible for no man to buy or sell without the mark. But then no, Microsoft has actually filed for a patent where the publication number w oh 2 0 2 0 0 6 0 6 0 6. Thus, making it possible for no man to buy or sell without taking the mark. Is it a coincidence, Karen? Is it just, it just happens to be that they chose that publication number and that happens to be the number in the Bible and then HR 666 and HR 6666. I mean...

Karen: (00:36:40):

And the enzyme that allows for, you know, creating inter-species or trans-species hybrids is called – Lucifer.

Clay: (00:36:50):

Oh, okay. Okay. Now the word Corona (means crown) Means crown and the word, the C, is the third letter of the alphabet. O, is the 15th under the alphabet. R the 18th under the alphabet. O is the 15th under the alphabet. N is the 14th under the alphabet. A is the first one of the alphabet. If you add up the word Corona mathematically, numerically it means 666. That's crazy. There's six letters in the word Corona. Then you say crown...what does that mean? Well, I'll tell you this folks open up your Bible to Revelation, Chapter 13, verse two, it says, "And the beast, which I saw was like unto a leopard and his feet were as the feet of a bear and his mouth as the mouth of a lion and the dragon..." Oh, here we go. "And the dragon gave him his power and his seat and his great authority." Now the dragon, what country has a dragon logo, dragon kind of mascot: China. And when you give somebody a seat, authority, power, you give them what? a crown. And so the word Corona is a crown in Latin. It means 6, 6, 6. Could it be, Karen, that these people are Satanic? Could it be?

Karen: (00:38:03):

Yeah, this is, let's be clear. I mean, what the scientists have done, and these globalists have done, is they figured out how, they figured out God's code. Right? And Einstein said that, like, if he could have anything, it would be the mind of God. So, they got, they figured out the way God, you know, they think they figured out the way God was thinking when he created us in his image. And what, so these scientists are now playing God, they're playing well, what if we can make our own creatures? What if we can make our own human beings and, you know, make them trans-species and then introduce AI to them. Like they're playing God. So who wants to be God Clay? What entity do you know that wants to be God?

Clay: (00:38:50):

Well, the World Economic Forum apparently is a big fan of trying to play God. You've got Klaus Schwab, the head of that organization. You have Bill Gates, you got Soros. You've got, I mean, there's these godless people are wanting to play. It seems like people that don't believe in eternal hell or heaven, they want to somehow create eternity on earth.

Karen: [\(00:39:10\)](#):

Exactly. And that's called hell. So Satan wants, has always wanted to be God, right? That's what Satan, Satan wants God's power and he wants to hurt God's children. So these people are acting on behalf of their father. They're not acting on behalf of our father. They're acting on behalf of their father.

Clay: [\(00:39:30\)](#): Final questions I have here for you. Just final question I have for you. Would it be accurate to describe you as a Pfizer whistleblower, a former Pfizer, but how would you describe, how do you, how do you describe that which you do?

Karen: [\(00:39:46\)](#):

I'm an analyst. A biotech... Literally companies pay me to read information, go through, you know, data, Excel, spreadsheets, you know, hundreds or thousands of pages, and then summarize it. And you know, 15 to 20 PowerPoint slides with what the key takeaways is.

Clay: [\(00:40:01\)](#):

You're a biotech analyst. Is that accurate?

Karen: [\(00:40:03\)](#):

Yeah. I'm an analyst. I read so of my clients don't have to. I mean, I literally have people knock me and be like, you're not a scientist or a doctor. All you do is read and summarize data. I'm like, what do you think an analyst does?

Clay: [\(00:40:14\)](#):

Okay. But people want to learn more about you. What's the website they can go to, if they want to learn more about you and what you're up to or where can they go in the future?

Karen: [\(00:40:24\)](#):

In the future? I think your help will go to: MIFIGHT, M I F I G H T.com and hopefully I'll end up building that platform out to empower people.

Clay: [\(00:40:33\)](#):

Can you repeat that again? Somebody was driving in their car and they were getting some baked beans. It was a crazy situation there. They were taking notes with an inch of sketch. What's that website one more time?

Speaker 5 [\(00:40:43\)](#):

M I F I G H T; MIFIGHT.com

Clay: [\(00:40:48\)](#):

And everything that you've shared on today's notes, on today's show, I have I've sourced cited. I've put together all the, everything you sent me so people can read these patents themselves. It's truly troubling. However, though, it is encouraging if you believe in the Bible, because you're seeing right now, this is a battle between good and evil. I mean, literally God exists, Satan exists. Other thoughts? I just want to get your thoughts on my final little four observations. It's kind of crazy. Bill Gates has a spiritual advisor. One might say, well, who's that? That's cool. That's cool. Bill Gates. All right. Okay. Who! You say, who's his spiritual advisor? Bill Gates as a spiritual advisor by the name of Marina Abramovich, Marina Abramovich. And if you type into: duckduckgo. Abramovich -- spirit cooking. You see that Bill Gates, his spiritual advisor is an admitted satanic spirit cooker. What are your thoughts on that? The guy pushing the COVID-19 vaccines has a spiritual advisor that, is a spirit cooker.

Karen: [\(00:41:49\)](#):

The, it's what you just said. This is a battle of good and evil. I think Charles Schwab had said, or someone in that group had said, "this is our God versus their God." And so what's been brought upon the world is an attack on God's children, and it is demonic. It is satanic. It is evil. There, that's the only way to describe it. And the greatest trick the

devil ever played on man was to convince him he didn't exist. Somehow or another Christians forgot that evil exists in this world, even though it wasn't that long ago, that there were concentration camps. It wasn't that long ago, there were, that was The Gulag Archipelago under Stalin and the work camps. It wasn't that, you know, in this, the spirit of evil and satanic worship doesn't disappear. It just moves into two new bodies, and beings, right.

Karen: [\(00:42:46\)](#):

And, it continually evolves. So, we ha... you know, I think what happened, was this country... this country was founded under God. And we just, you know, and I'm guilty of this, too. I built my life away from God. This country started building itself away from God. (Yep) You know, we need to come back to God and ask for forgiveness and repentance. We were betrayed, but we played a role in that betrayal by taking our hearts and our minds off of God and putting it on, you know, this, and, that's what's happened. And the thing is, I don't want people to be terrified because God always provides us. You know, he loves his children. He loves us more than we can possibly imagine. And if we repent, he will show us his mercy and there will be a healing. But if we think we are, we're going to follow these people who think they are greater than our God, they're greater than God. Then we're going to entrap ourselves in hell. Keep in mind what this is, is what... What Elon Musk is offering you, he's like, we can just take this and put it in here, consciousness to a server, and you'll never die. That sounds like hell to me. He's offering us hell

Clay: [\(00:44:02\)](#):

Now. Again. Because I know people are trying to keep up. I'll put it on today's show notes. Elon Musk recently was interviewed on the New York Post the article, and again, I'm citing everything you're saying here, so people can look this up themselves. March 6th, 2021, Elon Musk saw the article is titled, "could Elon Musk's Neuralink brain chips make us as smart as he is?" Also, I'll put a link to Elon Musk on Twitter, talking about how his company Neuralink is now hiring. He's hot. He's hiring, things are great. He says, "please consider working at Neuralink! (exclamation point). Short term, solve brain spine injuries. Long-term human AI symbiosis." Final two points I want to share. Bill Gates has a spiritual advisor who prays to Satan. Okay. We got that, right. Okay. Bill Gates chose to befriend the world's most prolific pedophile after he was arrested.

[\(00:44:47\)](#):

Bill Gates chose to befriend Jeffrey Epstein. After Jeffrey Epstein was arrested for being the world's most prolific pedophile. Jeffrey Epstein had a temple on his island. Why did Jeffrey Epstein have a temple on his island? Who was Jeffrey Epstein praying to it. Wasn't Jesus. He was praying to Satan. And Charles Lieber, the guy who created the nanotechnology that goes inside the human body in large part, Charles Lieber, he was arrested by the DOJ for failing to disclose he was making \$50,000 a month to work for the Chinese to make nano technology that goes inside the human body. Everything that we shared on today's show is cited. It's all right there. You can click the links, read the patents, share it with your family and friends until your head explodes. Karen, I'll give you the final word. What do you want to share with our listeners? I know you're going to come join us at the upcoming Reawaken America Tour events. People are so excited to see you. They want to shake their hand and want to support you. They want to shake your hand and support you. What's the final word of encouragement you want to share with our listeners?

Karen: [\(00:45:42\)](#):

God has not given us a spirit of fear, but of power, love, and sound mind. We got into the situation because we were afraid of losing material things, period. So, I would just say to people, you know, decide where you want to be a good member of society of, is it a tyrannical society that wants to enslave you and tell you that you don't have authority over your body? Or is it a member of a, of America that was founded under God? I mean, it's, it's our choice, what society we want to be members of, but, stop the vaccines and we can heal. I, the sooner we recognized that we were harmed, the sooner we can get together God's people and we can start healing one another. You know, with what he's provided us in nature, as well as with technology, with people who are here with the right hearts and minds to help humanity.

Clay: [\(00:46:31\)](#):

And president Trump or anybody out there that knows president Trump, if you want to end the pandemic and the COVID-19 craziness in like five minutes, if you're a governor, all you have to do: stop using the falsely calibrated COVID-19 PCR test. Step one. Step two, make budesonide, ivermectin...

Karen: Stop all testing, wait, stop all testing.

Clay: Stop it, yeah, stop the testing. And then make ivermectin, hydroxy chloroquine available over the counter. So that way the treatment is over the counter. They're already FDA approved and then...

Karen: (00:46:56):

No testing, no testing at all for COVID. Stop all the testing, stop the mask wearing and stop injecting people. If you stopped doing that and start using your heads as a doctor and a clinician and treating people for the symptoms of diseases that they have, as opposed to this blanket COVID-19 scam, which is what it is and then you're making people sick from a disease that they don't even have. Like stop it all, opt out of the whole system and start acting like human beings again.

Clay: (00:47:24):

Stop using the test. Stop using the tests. Step two, you can make budesonide, ivermectin, hydroxy chloroquine, these things available over the counter and three: stop using these RNA modified nanotechnology, fetal tissue, cell line derived [inaudible] field, luciferase technology COVID-19 vaccines. I just, it's so simple. It's so simple. I'm going to go get myself a swirly...

Karen: (00:47:46):

Shut down these, these freaking biotech companies that are, that are doing genetic sequencing and making a weaponized viruses.

Clay: (00:47:54):

Quick, final question for you. My final, final, final bonus fry question. How long has Moderna been in existence? I don't recall growing up as a kid saying, wow, Moderna is awesome. How long has Moderna been around approximately?

Karen: (00:48:05):

I think just over a decade, maybe 12 years. And they've gone through like billions of dollars of venture capital money. I mean, you know, it's my understanding, what I've been told is the government went to Moderna or the government went to Pfizer, they needed Pfizer's name. And they said, we need to bring these products to market. And then Johnson & Johnson, were the two most trusted names in the pharmaceutical industry in America. It's Pfizer and J & J, J & J baby powder. You know. I mean, J & J when Tylenol kills seven people in Chicago, they pulled it off the shelf across all of America. I mean, they're very trusted. And so is Pfizer, regardless of the track record, you know, with Vioxx and Celebrex and Tika center, I'm not going to go, I'm going to go on and on about recall.

Clay: (00:48:48):

I tell you what this, this show's serious. I typically don't want to give myself a swirly, but after today's show, I want to just run into the men's restroom. Make sure no one else is there. And give myself a swirly, refresh or something. Karen, thank you so much for being here and I can't wait to harass you on the Reawaken America Tour. And to introduce you to a crowd of thousands who are excited to cheer for you and celebrate you sharing the truth. Thank you so much. Have a great day.

Karen: (00:49:11):

Thanks, God bless everyone. Take care. Bye bye
